

FACILIPRO™**ECOLAB®**

PROTECT YOUR STUDENTS,
EMPLOYEES AND COMMUNITY

INFLUENZA: Combat the seasonal threat in your school.

- Influenza – often referred to as “flu” – is a virus that causes a common respiratory infection
- Influenza is easily passed from person to person via droplets produced when infected people cough, sneeze or talk
- Germs are brought into a school by staff and students and spread when a person touches a contaminated surface

Protect the health of your students and staff with a FaciliPro partnership.

FACT SHEET

WHAT IS INFLUENZA

Influenza, commonly referred to as “flu” or “seasonal flu,” is a virus that causes a common respiratory infection with fever and often respiratory complications that is easily passed from person to person. Severe cases occur more frequently in immunocompromised and elderly populations.

**3,000-
49,000
deaths**

annually in the United States
depending on the
severity of the
FLU SEASON.

PREVENTION

► TAKE ACTION

Know your flu facts.

Get access to
educational &
procedural information.

People with influenza
**should not prepare
food** or serve beverages
for others until their
**symptoms have
resolved.**

Sick?

Stay
home.

Encourage people to:

- Stay home
- Get plenty of rest
- Check with local health care provider as needed

FACT: Patients are most infectious during the **first three days** of illness.

Frequent handwashing.

Thoroughly wash **hands &
exposed portions of arms**
with soap & warm water

for at
least

seconds.

Use designated
handwashing sink.

Properly **cover
your mouth**
and nose with a **tissue**
or **sleeve** when
coughing
or sneezing

Germ are often spread when a person
touches something that is contaminated
with the virus and then touches his or her

**eyes,
nose
or mouth**

► CLEAN THOROUGHLY & ROUTINELY

CLEAN & SANITIZE

frequently touched surfaces with
a properly registered disinfectant.

- Light and air control switches
- Faucets and toilet flush levers
- TV and radio controls and telephones

- Door handles and push plates
- Other surfaces as needed

DISINFECT all **high touch point
surfaces** in the bathroom, including

those exposed to urine, feces or areas
where people cough and sneeze according
to standard infection control procedures.

RESPONSE

Simple steps to keep you safe

☐ 1. **Report** any suspected illnesses to management

☐ 2. **Follow** local public health guidelines for influenza

☐ 3. **Send home** infected individuals

☐ 4. **Stock** disinfectant products registered to be effective against influenza virus

☐ 5. **Clean & sanitize** following warewashing standards for contaminated ware

☐ 6. **Disinfect** “high-touch” surfaces with a product EPA-registered as effective against influenza virus

☐ 7. **Diligently practice** infection prevention, including washing hands frequently and use gloves when handling food

Reference specific cleaning & disinfecting procedures for each step
